INDEX OF AUTHORS

Volume 49 July–November 1994 Russian Toms 334–336

Abdrakhmanov, V. G. and Smolin, Yu. N. *A criterion for the existence of a Green's matrix in the Cauchy problem for a functional-differential equation* 174

Abgaryan, K. A. *On synthesis of a control in a multichannel nonstationary automatic control system on the basis of a prescribed set of single-channel subsystems* 398

———. *Solution of control problems for nonstationary multichannel automatic control systems by quasidiagonalization of the matrix of the linear part of the perturbed motion equations* 144

Al′shanskiĭ, M. A. See Mel′nikova, I. V.

Anikonov, Yu. E. *Formulas in a multidimensional inverse problem for an evolution equation* 62

Arkhipov, G. I. and Chubarikov, V. N. *Three theorems from analysis concerning trigonometric sums* 326

Arutyunov, A. V. and Aseev, S. M. *The maximum principle in optimal control problems with phase constraints. Nondegeneracy and stability* 38

Aseev, S. M. See Arutyunov, A. V.

Aseev, V. V. and Shalaginov, A. A. *Mappings that boundedly distort distance ratios* 248

Bakunin, G. N. See Bavrin, I. I.

Balabaev, V. E. *Complex canonical elliptic systems* 92

Bavrin, I. I. and Bakunin, G. N. *On ballistic functions* 552

Belyaev, V. A. *A description of the structure of the set of polynomial convergence in the complex plane* 64

Bernik, V. I. *Diophantine approximations and the sets of divergence of some Fourier series* 471

Bezgin, V. V., Khrennikov, A. Yu., Endo, M., and Yuoko [Yoko], O. *A statistical biological model with p-adic stabilization* 1

Bezmenov, I. V. *A method for the numerical solution of an interior problem for the Helmholtz equation with transmissivity conditions of variational type on an artificial boundary* 101

Bilalov, B. T. *Basis properties of some exponential systems and powers with shift* 107

Bitsadze, M. G. *Convergence in the space $L^p(T^n)$, $p \in (0, 1]$, of special multiple trigonometric series* 176

Bochkarev, S. V. *Almost everywhere convergence of integrals of Dini type* 183

———. *Series generated by Steklov functions* 154

Bolibrukh, A. A. *On analytic transformation to Birkhoff standard form* 150

Borisov, Yu. F. *Two questions on the metric foundations of Riemannian geometry* 474

Borisovich, Yu. G., Zvyagin, V. G., and Shabunin, V. V. *On solvability in W_p^{2m+l} of a nonlinear Dirichlet problem in a narrow strip* 179
Borodyanskiĭ, Yu. M. See Burgin, M. S.
Borovskikh, A. V., Lazarev, K. P., and Pokornyĭ, Yu. V. *On oscillation spectral properties of discontinuous boundary value problems* 328
Bozhinov, N. S. *On the root expansion for a nonlocal integrodifferential Sturm-Liouville operator with integral part of Volterra type* 369
Bratishchev, A. V. *On analytic continuation of functions uniformly approximable by exponential polynomials* 211
Bronshteĭn, E. M. *On convex compacta with prescribed extreme points* 497
Bruno [Bryuno], A. D. *First approximations of differential equations* 334
Bruno [Bryuno], A. D. and Soleev, A. *First approximations of algebraic equations* 291
Bulinskiĭ, A. V. and Lifshits, M. A. *Rate of convergence in the functional law of the iterated logarithm for nonstandard normalizations* 294
Burgin, M. S. and Borodyanskiĭ, Yu. M. *Operations and compositions in transrecursive operators* 572
Chentsov, A. G. *Asymptotic attainability and generalized representation of it* 138
Cheshkova, A. F. See Mikhaĭlov, G. A.
Chubarikov, V. N. See Arkhipov, G. I.
Demidenko, G. V. *On weighted Sobolev spaces and integral operators determined by quasi-elliptic equations* 113
Dolgiĭ, Yu. F. *Representation of the monodromy operator as the sum of a finite-dimensional operator and a Volterra operator* 43
Dubinskaya, V. Yu. *Homogenization of a stationary heat field in an inhomogeneous medium with three small parameters* 74
Èĭdel′man, S. D. See Kondrat′ev, V. A.
Emelichev, V. A. and Kravtsov, M. K. *On the unsolvability of vector discrete optimization problems on systems of subsets in the class of algorithms involving linear convolution of criteria* 6
Endo, M. See Bezgin, V. V.
Erëmin, I. I. *The Pareto-sequential problem of linear optimization, and duality* 47
Ershov, Yu. L. *Decidability of the theory of the class of fields F_*^f* 582
———. *Model-theoretic properties of RC^*-fields* 255
———. *On the Galois groups of RC_ζ^*-fields* 79
Fayazov, K. S. *On the Cauchy problem for a second-order linear elliptic equation with operator coefficients* 548
Gekhtman, M. M., Gekhtman, M. M., Jr., and Zagirov, Yu. M. *Sharp estimates of normalized eigenfunctions of the Sturm-Liouville operator on a finite interval with continuous positive weight function* 68
Gekhtman M. M., Jr. See Gekhtman, M. M.
Gel′fand, I. M., Graev, M. I., Retakh, V. S., and Spirin, S. A. *(r, s)-exponentials* 577
Glushko, V. P. and Tkacheva, S. A. *On the heat equation with essentially variable coefficient* 408
Gorshkov, A. F. and Solomentsev, Yu. M. *Applicability of vertex replacements for a class of problems on K-vertex subgraphs* 478
Graev, M. I. See Gel′fand, I. M.
Gromova, L. L. *An estimate of the seventh coefficient in the class of odd functions* 71
Gutlyanskiĭ, V. Ya. and Zaĭdan, A. O. *On Kufarev's method of determining the parameters in the Schwarz-Christoffel integral* 445

Iliadis, S. D. *Universal regular spaces of weight τ* 10
Kachalov, V. I. and Lomov, S. A. *Pseudoanalytic solutions of singularly perturbed problems* 194
Kapustin, N. Yu. *On the topological theory of generalized analytic functions*.. 303
Khlobystov, V. V. See Makarov, V. L.
Khrennikov, A. Yu. See Bezgin, V. V.
Kokilashvili, V. M. and Lizorkin, P. I. *Two-weight estimates for multipliers, and imbedding theorems* 515
Kondrat'ev, V. A. and Èĭdel'man, S. D. *On positive solutions of second-order quasilinear elliptic equations* 124
Korobeĭnik, Yu. F. *On epimorphism of the convolution operator in some spaces of analytic functions* 418
Koshelev, V. N. *On the divisibility problem for stochastic channels with a given constraint function* 223
Kostin, V. A. *On the solution of a problem involving the abstract cosine function* 556
Kozhanov, A. I. *Well-posedness of initial boundary value problems and properties of solutions for parabolic equations with nonlinear nonlocal sources* ... 484
Kravtsov, M. K. See Emelichev, V. A.
Kurochkin, S. V. *A method for finding the eigenvalues of a nonselfadjoint boundary value problem* 520
Kuzin, I. A. *On block-radial solvability of nonlinear elliptic problems in* $\mathbb{R}^N$ ... 309
Kuznetsov, E. B. See Shalashilin, V. I.
Lazarev, K. P. See Borovskikh, A. V.
Levin, V. L. *Exchange models with indivisible commodities, and implementation of competitive equilibria in games of auction type* 15
Lifshits, M. A. See Bulinskiĭ, A. V.
Lizorkin, P. I. See Kokilashvili, V. M.
Lomov, S. A. See Kachalov, V. I.
Loseva, N. V. *On some properties of saddle hypersurfaces of tube type* 524
Lyakhov, L. N. *Spaces of Riesz B-potentials* 83
Makarov, V. L. and Khlobystov, V. V. *Increasing the accuracy of approximations of polynomial operators in Hilbert spaces by the interpolation method* 20
Makhmudov, A. P. and Rasulov, M. M. *On perturbation of an isolated eigenvalue of finite multiplicity in a spectral problem for a pair of selfadjoint operators* 423
Mal'tsev, I. M. *Epimorphicity of a convolution operator in spaces of functions analytic on connected sets* 501
Martynyuk, A. A. *On the exponential multistability of separating motions* 528
Matveĭchuk, S. A. See Petunin, Yu. I.
Mednykh, A. D. See Vesnin, A. Yu.
Mel'nikova, I. V. and Al'shanskiĭ, M. A. *Well-posedness of a degenerate Cauchy problem in a Banach space* 449
Mikhaĭlets, V. A. *The one-dimensional Schrödinger operator with point interactions* 345
Mikhaĭlov, G. A. and Cheshkova, A. F. *Monte Carlo solution of the Dirichlet problem for elliptic systems with variable parameters* 587
Mikhaĭlov, G. A. and Voĭtishek, A. V. *Convergence of computational models of random fields connected with Palm point flows* 313
Mikhaĭlov, L. G. *On a method for investigating systems of ordinary differential equations with singular points* 454
Mikhalev, A. A. See Zolotykh, A. A.

Moiseev, E. I. *On the existence and uniqueness of the solution of a nonclassical boundary value problem* 532
Molchan, G. M. *Multi-monofractal properties of zeros of Brownian motion*.... 350
Musin, I. Kh. See Napalkov, V. V.
Napalkov, V. V. and Musin, I. Kh. *On polynomial approximation in a weighted space of entire functions* 25
Naumkin, P. I. and Shishmarev, I. A. *On the connection between the solutions of various nonlinear equations for large time*..... 127
Nefedov, N. N. *Nonstationary spike-type contrast structures in nonlinear singularly perturbed parabolic equations*..... 489
Nikol'skiĭ, S. M. *Bernstein-type inequalities for algebraic polynomials on manifolds*..... 266
Nikonorov, Yu. G. *On sharp estimates in the first mean value theorem*..... 493
Novitskiĭ, M. V. *Quasianalytic classes of decreasing functions, and integrals of motion of the Korteweg-de Vries equation* 271
Orudzhev, G. D. *On solvability of boundary value problems for an abstract polyharmonic equation* 88
Pavlov, A. I. *Asymptotics of the number of permutations with number-theoretic restrictions on cycle length*..... 380
Pelyukh, G. P. *On the structure of the general continuous solution of systems of linear difference equations with periodic coefficients*..... 560
———. *On the theory of linear difference equations with periodic coefficients*. 536
Petukhov, A. P. *On approximation of periodic distributions in the Hausdorff metric*..... 460
Petunin, Yu. I. and Matveĭchuk, S. A. *Hypothesis testing with the help of statistical tests using a procedure for rejecting decisions*..... 507
Pichugov, S. A. *Sequences of operators bounded in measure* 198
Pletner, Yu. D. *On new classes of generalized analytic functions*..... 29
Podkolzin, A. S. *A computer solver of mathematical problems* 355
Pokornyĭ, Yu. V. *On integral representation of Markov systems*..... 229
Pokornyĭ, Yu. V. See Borovskikh, A. V.
Prokhorenko, V. I. *On approximate and exact solutions of linearized Navier-Stokes equations in the case of plane flow* 233
Pugachev, V. S. *On certain measures on a function space, with values in a Hilbert space*..... 276
———. *Stochastic differential equations in Hilbert spaces*..... 592
Ramazanov, M. D. *Boundary layer functions of asymptotically optimal lattice cubature formulas* 240
Rasulov, M. M. See Makhmudov, A. P.
Repin, O. A. *A nonlocal boundary value problem for a degenerate hyperbolic equation*..... 319
Retakh, V. S. See Gel'fand, I. M.
Rovenskiĭ, V. Yu. *Metric decomposition of foliations with nonnegative curvature*..... 202
Ryazanov, V. I. *On homeomorphisms of Sobolev class and mappings quasiconformal in the mean* 322
Sabitov, K. B. *On the Tricomi problem for Chaplygin's equation* 359
Sadybekov, M. A. *A new type boundary value problem for the wave equation*. 564
Sander, S. A. *The maximum principle for elliptic problems in the finite element method* 386

Savateev, E. G. *On the reduction of an inverse problem for an equation of hyperbolic type* 163
Semenov, E. M. *Estimates of multipliers with respect to the Haar system in the space L_1* 167
Serikbaev, A. U. *On a multidimensional inverse problem for the generalized Weber potential "in the small"* 391
Serov, V. S. See Zhornitskaya, L. A.
Shabunin, V. V. See Borisovich, Yu. G.
Shalaginov, A. A. See Aseev, V. V.
Shalashilin, V. I. and Kuznetsov, E. B. *The best parameter for extension of a solution* 170
Shestakov, I. P. *Quantization of Poisson algebras, and weak speciality of the Jordan superalgebras associated with them* 34
Shin, V. I. See Sinitsyn, I. N.
Shirokov, N. A. *Approximation in the sense of Dzyadyk on compact sets with complements of infinite connectivity* 431
Shishmarev, I. A. See Naumkin, P. I.
Shmelev, A. S. *Some properties of symplectic and hyper-Kählerian structures*. 511
Sidorov, N. A. *On explicit parametrization of solutions to nonlinear equations in the neighborhood of a branching point* 568
Sinitsyn, I. N. and Shin, V. I. *Conditionally optimal interpolation of random sequences defined by difference equations* 539
Skubachevskiĭ, A. L. *Generalized and classical solutions of boundary value problems for differential-difference equations* 132
———. *On the problem of damping a control system with aftereffect* 282
Smolin, Yu. N. See Abdrakhmanov, V. G.
Smolyanov, O. G. and Smolyanova, M. O. *The Feynman integral and nonlinear transformations of phase space* 465
Smolyanova, M. O. See Smolyanov, O. G.
Sodin, M. L. and Yuditskiĭ, P. M. *Infinite-zone Jacobi matrices with pseudo-extendible Weyl functions and homogeneous spectrum* 364
———. *The infinite-dimensional real Jacobi inversion problem, and Hardy spaces of character-automorphic functions* 287
Soleev, A. See Bruno [Bryuno], A. D.
Solomentsev, Yu. M. See Gorshkov, A. F.
Spirin, S. A. See Gel'fand, I. M.
Stanev, M. A. *Surjective isometries in Banach spaces of slowly growing holomorphic functions on a ball* 206
Stepanov, V. D. *On the singular numbers of a class of integral operators* 545
Sultanaev, Ya. T. See Valeev, N. F.
Tabarintseva, E. V. See Tanana, V. P.
Tanana, V. P. and Tabarintseva, E. V. *On a new approach to regularization of ill-posed problems* 394
Tkacheva, S. A. See Glushko, V. P.
Trigub, R. M. *Multipliers in the Hardy spaces $H_p(D^m)$, $p \in (0, 1]$, and approximation properties of summation methods for power series* 427
Trubin, V. A. *Strength decomposition of graphs* 244
Valeev, N. F. and Sultanaev, Ya. T. *On the asymptotic behavior of solutions of a singular Sturm-Liouville equation* 403
Ventsov, Yu. G. *Constructive models of infinite algorithmic dimension* 251

Vesnin, A. Yu. and Mednykh, A. D. *On limit ordinal numbers in the Thurston-Jorgensen theorem on the volumes of three-dimensional hyperbolic manifolds* 435
Voĭtishek, A. V. See Mikhaĭlov, G. A.
Volchkov, V. V. *Approximation of functions on bounded domains in R^n by linear combinations of shifts* 160
Volkov, E. A. *On solution of the Laplace equation by the block method on polygons under piecewise constant boundary conditions* 375
Volkov, V. E. *On fast approximate methods of solving the difference Laplace equation in a cube* 440
Vorob′ev, A. O. and Vorob′ev, O. Yu. *Summation of set-additive functions and the Möbius inversion formula* 340
Vorob′ev, O. Yu. See Vorob′ev, A. O.
Yoko, O. See Bezgin, V. V.
Yuditskiĭ, P. M. See Sodin, M. L.
Yuoko [Yoko], O. See Bezgin, V. V.
Zagirov, Yu. M. See Gekhtman, M. M.
Zaĭdan, A. O. See Gutlyanskiĭ, V. Ya.
Zavgorodniĭ, M. G. *Spectral completeness of the root functions of a boundary value problem on a graph* 298
Zheludev, V. A. *Wavelets based on periodic splines* 216
Zhikov, V. V. *On the homogenization of the system of Stokes equations in a porous medium* 52
Zhornitskaya, L. A. and Serov, V. S. *On a uniqueness theorem for the Sturm-Liouville operator with a strongly singular potential on a closed interval* ... 119
Zolotykh, A. A. and Mikhalev, A. A. *The rank of an element of a free Lie (p-)superalgebra* 189
Zubov, V. I. *Analytic construction of Lyapunov functions* 414
———. *Potential systems of differential equations* 58
———. *The problem of twisting of beams of charged particles* 260
Zvyagin, V. G. See Borisovich, Yu. G.
